cThru

Don't let your smile hold you back...

You should be proud of your teeth and confident to smile.

A winning smile is the key to confidence, happiness and success.

C-thru positioners can help you achieve a perfect smile. C-thru positioners are virtually invisible, are made from lightweight plastic, and easy to wear.

The C-Thru positioners only need to be removed for eating, brushing and flossing.

Your first steps to a perfect smile...

Ask your clinician for a C-Thru Assessment.

From the assessment your clinician will be able to tell you approximately how long your treatment will take (the average is between 6-12 months) depending on the degree of tooth movement required and the number of positioner stages.

The duration of treatment is dependent on the number of C-Thru stages. Each stage is worn for approximately 2 weeks until the positioner becomes loose fitting, when the next stage is inserted. Keep the previous stage in case of loss of the current positioner.

FAQ

How much does C-Thru cost?

C-Thru is one of the most competitive clear brace systems in the UK. Your clinician will determine what the actual cost of your specific treatment will be.

Is Finance available?

Yes, finance is available to stage payments if required. Ask your clinician for details.

Are they really C-Thru?

Yes. The positioners are made of clear plastic material.

Will C-Thru affect my speech?

No, because there is nothing in the palate to obstruct the tongue so speech is unaffected.

Are they for adults only?

No. Provided all the adult teeth are in place the C-Thru positioners can be used by teenagers.
